ABSTRACT

In 1992-93, there were 42.7 million students enrolled in public elementary and secondary schools in the 50 states and the District of Columbia. Of these, 24 million were in prekindergarten through grade 6, 17.9 million were in grades 7 through 12, and 0.8 million were in ungraded classes. Nearly 2.5 million teachers provided instruction for these students, with 1,362,000 teachers in elementary schools and 213,000 in secondary schools. The ratio of total students to total teachers for the nation was 17.4 students per teacher. There were 44,000 school district officials and administrators and 122,000 school administrators. Some 2,212,000 students received regular high school diplomas in 1991-92 school year, and an additional 64,000 received other types of diplomas. A pie graph illustrates the staff distribution by category for elementary and secondary education, and four tables present the national information on school membership, student-teacher ratios, and staff employed. How many students are currently enrolled in public elementary and secondary schools? How many staff members are paid to teach, supervise, and provide support services for education? How many students graduate from high school? The information to answer these and other questions is reported in the National Center for Education Statistics' "State Nonfiscal Survey of Public Elementary and Secondary Education," School Year 1992–93.

How many students were enrolled in public elementary and secondary schools?

In school year 1992–93, there were 42.7 million students enrolled in public elementary and secondary schools in the 50 states and the District of Columbia (table 1). Of these students, 24.0 million were in prekindergarten through grade 6, an additional 17.9 million were in grades 7 through 12, and the remaining 0.8 million were ungraded students.[1]

California had the most public elementary and secondary school students (5,196,000), followed by Texas (3,536,000) and New York (2,690,000). The three lowest student counts were in the District of Columbia (81,000), Vermont (99,000), and Wyoming (100,000).

How many teachers are there?

Nearly 2.5 million teachers provided instruction in public elementary and secondary schools in the 1992–93 school year (table 2). Among this group, 1,362,000 were elementary school teachers (including prekindergarten and kindergarten teachers) and 213,000 were secondary school teachers. The remaining teachers taught ungraded students.[2]

The ratio of total students to total teachers for the nation was 17.4 students per teacher. These ratios ranged from lows of 13.3 students per teacher in the District of Columbia and 13.6 in New Jersey to a high of 24.2 in Utah. The median student per teacher ratio was 16.9, that is, half the states had a higher student/teacher ratio than 16.9, and half the states had a lower ratio. Student/teacher ratios should not be interpreted as average class size since not all teachers are assigned to a class.

How many staff supervise or provide support services for public education?

There were 44,000 school district officials and administrators, and 122,000 school administrators reported for school year 1992–93 (table 3). Instructional aides numbered 427,000. An additional 81,000 staff were guidance counselors and 50,000 were librarians. This translates to about 527 students for every guidance counselor reported, and 852 students

U.S. Department of Education

TM021979

for each librarian. At least 1,372,000 staff members provided support services for schools and school districts. This support included clerical, data processing, food, health, library, maintenance, transportation, security and other services in the nation's public schools.[3] The relative distribution of these staff are illustrated in a pie chart (figure 1) with the two largest portions being teachers (54.2 percent) and support services staff (29.8 percent). On the average, there were 15 teachers and 8 support staff for each administrator.

How many students graduated from high school during the 1991–92 school year?

Some 2,212,000 students received regular high school diplomas in the 50 states and the District of Columbia during the 1991–92 school year (table 4). An additional 64,000 students received other types of diplomas, and 20,000 students received high school completion certificates. The recipients of high school completion certificates reported in this publication are 19 years old or younger (except in Tennessee, which reported recipients of all ages).

Technical Notes

The "State Nonfiscal Survey" is an annual state-level collection of student, staff, and graduate counts for grades prekindergarten through 12. The data are collected from state education agencies (SEAs), processed and edited by NCES, and then verified by each SEA. The "State Nonfiscal Survey" is part of the Common Core of Data collection.

State agencies vary in their data collection and reporting systems, with resulting inconsistencies across states. Most of the missing data in the tables of this publication are included in other reported counts. For example, Maine includes prekindergarten and kindergarten teachers in the state's elementary teacher count. In other cases, a category may not be applicable for a state (for example, a state may not designate any pupils as ungraded) and the count is reported as '0.'

For further information about this *Statistics in Brief* or the complete data set, contact Frank Johnson, National Center for Education Statistics, 555 New Jersey Avenue NW, Washington, DC 20208–5651; or call (202) 219–1618; or fax (202) 219–1728; Internet address "fjohnson@inet.ed.gov".

Endnotes

[1]The five outlying areas are not included in national totals. Five states did not report prekindergarten students, producing undercounts in this and the total student categories for these five states and the nation.

[2]The data reported for prekindergarten and total teachers represent an undercount because prekindergarten teachers are not counted in three states. Missing kindergarten and ungraded teachers are included in other teachers categories reported here.

[3]Four states were unable to provide complete counts of their support staff.

* National totals are omitted for prekindergarten students because of missing data in five states. Student totals in these states, one outlying area, and the national total are undercounts. States vary in the type of PK programs offered and reported.

— Data missing or not available.

NOTE: Some states do not designate any students as 'ungraded.' See technical notes in the text.

a/ See footnote to table 1 regarding missing data for student membership.
b/ National totals are omitted for prekindergarten and kindergarten teachers and teachers of ungraded classes because of missing data in some states. Prekindergarten teachers are not counted in Alabama, Arkansas, and California. As a result of these missing teacher counts, total teachers in these three states and the nation are undercounted.
--- Data missing or not available. These counts are included in other teacher categories except where noted above.
NOTE: Some states do not designate any teachers as 'ungraded.' Elementary and secondary teacher counts are not directly comparable across states due to differences in the grades included in these designations.

a/ Total staff are undercounted in seven states and in the national total. See footnotes below.
b/ See footnotes to table 2 regarding missing data for teachers.
c/ National totals for instructional coordinators and other support staff are omitted because of missing data from states. Louisiana, Montana, and Nebraska report only a portion of their other support staff. Virginia did not report any support staff.

Footnotes are continued at the bottom of the continuation of this table on the next page.
